

# UNIX System V Release 4 Programmers Guide Character User Interface (FMLI and ETI)

For application developers who want to develop a menu- and form-based interface, this book describes the tools a programmer can use for terminals lacking graphic capabilities. It covers FMLI, a high-level programmer for creating menus, forms and text frames, and ETI, a set of screen management library subroutines that promote fast development of application programs for window, panel, menu, and form manipulation.
