

New York City Bridge Conference (Journal of Bridge Engineering, Vol 6 No 6 November/December 2001)

This special issue contains 30 state-of-the-art papers covering a wide range of subjects in the field of bridge engineering. It covers current trends as well as future developments in bridge design, maintenance, and retrofitting. These papers provide an excellent opportunity to learn about the latest proposed solutions to the urgent issues and serious challenges that confront the bridge engineering community.
