

There is need for books written from the standpoint of a coach who thinks in terms of high school players. *How To Coach And Manage High-School Basketball Teams* is such a book. The author has had considerable successful experience in coaching high school teams. His philosophy of the game and his method of presenting the strategy of offense and defense is tempered by this experience. The plays which are diagrammed and the practice formations are based on actual coaching experience and they appear to have been culled with great care from the many which have been used experimentally. This book should prove to be of value not only to the player and beginning coach but also to the experienced coach who is always anxious to pick up ideas from drills and formations which have been used successfully by a co-worker.
